AutoCad on the Go!

Experience the freedom of taking your designs with you — wherever you go.

AutoCAD® WS is a mobile CAD application that gives you the freedom and flexibility to view, edit, and share your DWG™ files on your Android/ Apple powered phone/ tablet/ iPad Touch. AutoCAD WS mobile app offers a simplified, intuitive set of viewing, editing, and markup tools so you can work on your designs while you are on the go. Open drawings from email attachments, sync your files from the web, or upload drawings directly from AutoCAD software. Drawings can also be saved locally so you can work in the field without an Internet connection.

This free App is available on both the Android Marketplace and iTunes App Store, working great on the iPod Touch, iPad 2, Motorola Xoom or Samsung Galaxy Tab.

Green Computing?

Always wanted a wireless keyboard, but never fancied the hassle of all them batteries? How about a solution that doesn't need them?

The Logitech K750 is a solar-powered wireless keyboard, capable of recharging off of simple ceiling lights, and provided 3 months worth of use on a single charge (even though it would constantly draw power if in a lit room), the K750 sounds like a great solution to throw away those batteries. Available for £59.00 ex VAT from WBS.

SLC Competition

The winner of our SLC Competition to win a Quicktionary TS Scanning Pen was Lizzie Ledger from Ruskin College, congratulations.

ReadEasy+

At the touch of a button ReadEasy+ translates printed text into crystal clear speech within seconds. Letters, books, bank statements, product information, cooking instructions, product packaging etc. can all be easily read out loud.

The specially developed camera even allows you to read extremely thick books without having to flatten and damage their spines, even round objects such as tins of food can be read.

The features of the ReadEasy+ can be expanded by purchasing one of the additional feature packs:

- The **Advanced Feature Pack** consists of an additional keypad that provides more advanced features such as saving, loading, multipage documents, importing and exporting.
- The **Low Vision Pack** enables ReadEasy+ to display your documents in large print on an external monitor or TV (uses VGA, DVI or HDMI). You can choose your preferred print colour, size, line spacing and view your document from x0.2 to x80 magnification in one of 6 different viewing modes. The document can also be read out loud at the same time helping to provide a complete all-round solution.

A machine that reads things to you!

- Simple to use
- Only 6 buttons
- Compact
- Lightweight
- Fast & Accurate
- Expandable

Additional feature packs:
Advanced
Low Vision (includes Advanced)
Low Vision (inc. Adv) & Touch Screen

Full PR Available at request.

Pricing from around £1700 ex VAT

As seen at the SLC Expos!
